The 2026 pre-release context

- This year the context is the confectionery and biscuit industry, and the small, national, and international businesses operating in this market

- To prepare for this year's context, you should research:
  - Current trends in the consumption of confectionery and biscuits
  - Business growth in the UK and world confectionery market
  - Different businesses in the UK confectionery retail market: independents and multinationals
  - The external business environment and its impact on small businesses operating in the confectionery market
  - Global marketing by confectionery businesses
  - Local, national and international economic influences on confectionery businesses
- You cannot take any of your research or investigation data carried out as part of the pre-release into the examination

Using the pre-release context

Stuck on something?
Ask questions and get help with exactly what you're revising.
Got it
Help me understand

- The pre-release outlines key topics (such as consumption trends, business growth and global marketing by confectionery businesses)
- Although the source booklet you are given on the day of the exam will contain unseen extracts, they'll connect to these broad themes

Examiner Tips and Tricks

For each bullet point in the pre-release, draft a mini-summary of the main ideas (e.g. independents vs. multinationals, local, national and international economic influences)

Match bullet points to frameworks you've learnt, such as Porter's Five Forces, SWOT, the product life cycle and so on

Gather broad knowledge

- Having some context about current trends in the consumption of confectionery and biscuits lets you spot key issues quickly. Yet there's no need to cram endless stats - your chief priority is using the brand-new data from the exam extracts
- Read about how the external business environment impacts small businesses in the confectionery market
- Understanding the "why" behind numbers means you can interpret them more easily under exam conditions
- The exam might focus on a niche biscuit manufacturer or a large multinational chocolate company
- A general sense of trends and problems in the confectionery industry will help no matter which angle appears

Practice handling unseen extracts

- Paper 3 introduces brand-new extracts in the exam itself
- You must read them quickly and apply business principles on the spot

Examiner Tips and Tricks

Use previous Paper 3 or practice examples, set a timer, read extracts once or twice and outline how you'd structure answers

Look out for issues like rising costs, changing market shares, or staff turnover. These clues often guide you to theories or concepts you can discuss

- Paper 3 typically includes calculations or data interpretation (e.g. profits, capacity, or market share). Many students lose marks by rushing or mixing up figures
- Make sure you're comfortable with break-even, profit margins, ratio analysis, and so on
- After doing a quick calculation, practise adding a sentence about what that number really means for the business scenario

Plan for essay questions in context

- In the exam, your responses must be grounded in the confectionery industry extracts. General discussion of business concepts alone isn't enough
- Perfect your structure for each type of question (8–, 10–, 12–, and 20–mark)
- Your structure must provide opportunities to
  - **State** a clear point or define the concept
  - **Apply** to the scenario - quote facts or figures from the extract
  - **Analyse** with a chain of reasoning (causes, effects, potential outcomes)
  - **Evaluate** by balancing pros/cons or introducing "it depends" factors

- Show you can see both positives and negatives. For example, a small, niche biscuit manufacturer may benefit from increasing incomes, but struggle to gain market share from multinational competitors

Be ready for the unexpected

- Although you know the general theme, the specific businesses or statistics in the **unseen extracts** might surprise you.

Examiner Tips and Tricks

When you read the full extract in the exam, identify the core concept. Whether it's staff motivation at a small chocolate manufacturer or resource management for an expanding biscuit producer, link it back to theories (like Herzberg for motivation, or stakeholder mapping for global confectionery manufacturers)

You'll have enough data in the extract to form a relevant answer. The exam expects you to apply concepts to the given information, not to recall heaps of outside facts
