Structure & Role of the Mammalian Nervous System

- The **human nervous system** consists of the:
  - **central nervous system** (CNS) - the brain and the spinal cord
  - **peripheral nervous system** (PNS) - all of the nerves in the body
- It allows us to
  - Make sense of our surroundings and respond to them
  - **Coordinate** and **regulate body functions**
- Information is sent through the nervous system as **nerve impulses** - electrical signals that pass along nerve cells known as **neurones**
- A bundle of neurones is known as a **nerve**
